

Volume 2

By Katy Swalwell & Janelle Ketcher

Ask students to create a “Volume 2” to Amazing Iowa Women. Depending on their age and ability, either provide them a list of options or have them research their own women after being assigned a letter of the alphabet. If the class size is big enough, pair students together. Students can design the book using collage methods like [THIS](#) or creating their own artwork.

Each student should create a page for the book with the following information:

- Name of Woman
- Where did they grow up and how did they find their passion?
- What was their impact on their community?
- What can we learn from them?
- What are 3 keywords for this woman and their work?

Younger students can read their pages to each other. Older students can volunteer to share their class book with students in younger grades.
